

WARNING

AIR COIL ROOFING NAILERS

Any piece of equipment can be dangerous if not operated properly. **YOU** are responsible for the safe operation of this equipment. The operator must carefully read and follow any warnings, safety signs and instructions provided with or located on the equipment. Do not remove, defeat, deface or render inoperable any of the safety devices or warnings on this equipment. If any safety devices or warnings have been removed, defeated, defaced, or rendered inoperable, **DO NOT USE THIS EQUIPMENT!!!**

⚠ WARNING: This product can expose you to chemicals including naphthalene and benzene from petroleum products which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65warnings.ca.gov

<<< WARNING >>>

DO NOT TAPE DOWN OR OTHERWISE BY-PASS ANY SAFETY DEVICES!

<<< DANGER >>>

Compressed air can cause extremely serious injuries. The pressurized air can pierce skin, damage eyes, and burst eardrums. USE EXTREME CAUTION

Always wear eye and hearing protection.

DANGER: This tool is intended to drive nails into roofing material, and therefore into the roof of a building. NO ONE should be allowed inside the building where a roofing nailer is being used, as there is a real risk that a fastener could through penetrate the roof deck striking an occupant of the building.

IMPORTANT SAFETY RULES TO FOLLOW

1. Eye protection should always be worn by the operator and others in the work area.
2. Ear protection may be required in some environments.
3. Do not use oxygen, combustible gases or bottled gases as a power source for this tool as tool may explode, possibly causing severe injury or death.
4. Do not use air supply sources, which can potentially exceed 200 psig as tool may burst, possibly causing severe injury or death.
5. The connector on the tool must not hold pressure when air supply is disconnected. If a wrong fitting is used, the tool can remain charged with air after disconnecting and thus will be able to drive a nail or staple even after the airline is disconnected.
6. Do not pull trigger or depress the contact tip while connecting the air supply as the tool may cycle.
7. Always disconnect air supply when not in use, clearing a jam, or moving to a different work area.
8. When loading the tool never place your hand or any other body part in the fastener discharge area. ***Never point the tool at yourself or any other person.***
9. Never engage in horseplay. Never pull the trigger unless it is directed toward the work.
10. Never use parts or fasteners other than those specifically recommended for the tool.

WARNING: This nailer produces SPARKS during operation. NEVER use the nailer near flammable substances, gases, or vapors including lacquer, paint, benzine, thinner, gasoline, adhesives, mastics, glues, or any other material that is -- or the vapors, fumes, or byproducts of which are -- flammable, combustible or explosive. Using the nailer in any such environment could cause an EXPLOSION resulting in personal injury or death to user and bystanders.

If the person receiving this handout will not be the user of the equipment, forward these instructions to the operator. If there is any doubt as to the operation or safety of the equipment,

DO NOT USE!!! CALL A TOOL SHED IMMEDIATELY!!!

FAILURE TO FOLLOW THESE INSTRUCTIONS COULD RESULT IN INJURY OR DEATH
